

Precision Fascia Release for Recovery, Performance, and Prevention

Portable Performance & Recovery System

MYOS Technology is a compact, field-ready system engineered for portability, consistency, and real-world performance environments. Designed to move easily between locations, MYOS delivers reliable operation without sacrificing usability or durability.

MYOS Technology delivers targeted, controlled therapeutic energy to soft tissue and fascial layers using precision attachments designed for different body areas. The system supports myofascial release, muscle recovery, performance optimization, and proactive injury prevention through consistent, localized application in both mobile and clinical environments.

Its portable, ergonomic design allows operators to integrate fascial decompression, tissue mobility work, and preventative maintenance protocols wherever treatment is needed, without bulky or stationary equipment.

Key Features

<p>Padded Fabric Carrying Case Durable, protective case designed for transport, storage, and daily use in mobile environments.</p>	<p>Touchscreen Integration Intuitive touchscreen interface allows for quick setup, easy adjustments, and clear visibility during operation.</p>	<p>Integrated Tool Holder Built-in tool storage keeps attachments secure, organized, and immediately accessible.</p>
<p>Total Portability. Flexible Power. Operate untethered with the optional external rechargeable battery, or plug in for continuous power when mobility isn't required..</p>	<p>Easy-to-Clean Attachments Detachable attachments are designed for fast cleaning and maintenance to support hygiene and repeat use.</p>	<p>Integrated Feet for Angled Viewing Fold-out feet allow the system to rest at an ergonomic angle for improved screen visibility and hands-free operation.</p>

Technical Specifications

Device + Case

- Dimensions (with case): 13.5" wide × 11.5" high × 6.5" deep
- Working Time: Up to 8 hours with optional external rechargeable battery
- Portability: Fits within standard airline carry-on luggage compartments
- Manufacturing: Made in the USA

Attachments

Five interchangeable attachment sizes for targeted application across different body areas:

- 3/8"
- 9/16"
- 3/4"
- 1-1/8"
- 1-1/2"
